

Governance Hub

Doorfinanc  

Transparent Voting

Conceal the identity of voters and proposals to ensure fairness and security. This feature allows for anonymous voting and proposal submission, protecting user privacy and ensuring the integrity of the governance process.

Automated Execution

Once a proposal is approved, the system automatically executes the proposed actions, ensuring that the community's decision is implemented without delay or manual intervention. This streamlines the governance process and reduces the risk of human error.

Community Proposals

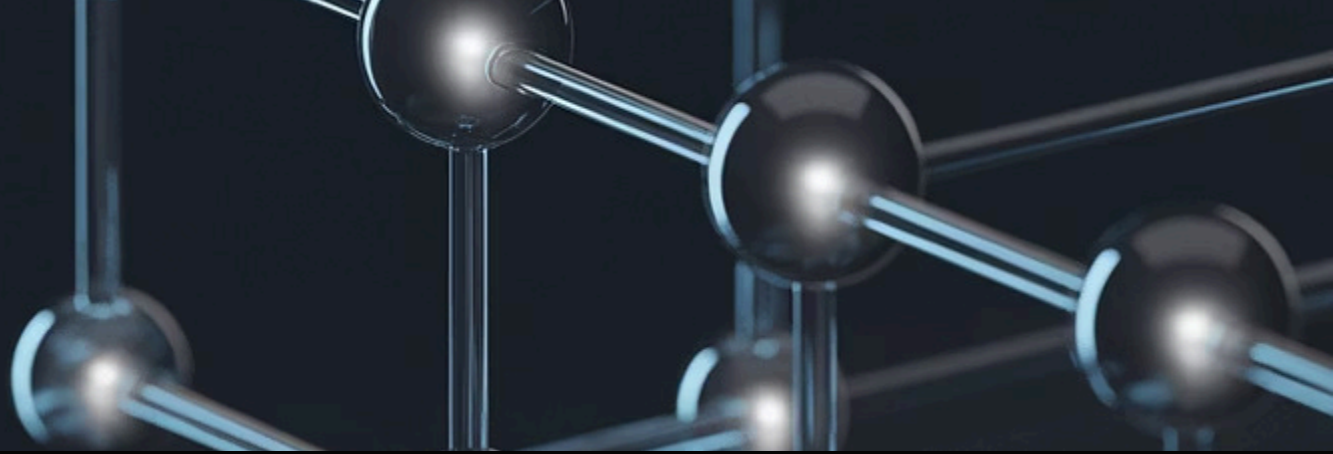

Anyone in the community can submit a proposal for consideration, allowing for a wide range of ideas and initiatives to be brought forward. This feature encourages active participation and ensures that the community has a direct say in the project's future.

iSelfToken Governance Model

At iSelfToken, we believe ideas deserve to be born with structure. Our governance model is designed to revolutionize the funding ecosystem by creating a culture where governance, transparency, and strategic intelligence form the foundation for growth. This presentation explores how our model protects ideas, empowers talent, and safeguards investments through a structured approach to startup development.

iSelfToken Crowdfunding

Governance Structure

The Core Philosophy

Born With Structure

Ideas deserve proper foundation from inception, not as an afterthought

Complete Transparency

Clear allocation of funds with traceable outcomes and accountability

Smart Governance

Professional oversight in critical areas from day one of operations

Startup Requirements

Phase Selection

Correctly identify whether in Ideation, Validation, or Early Operation phase during registration

Strategic Delegation

Delegate mandatory strategic sectors to platform-approved partner companies with specialized expertise

Fund Allocation

Allow direct allocation of raised funds to responsible partners based on validated plans

Milestone System

Operate within a transparent accountability system with clear milestones and deliverables

Strategic Sectors

Marketing & Positioning

Strategic brand development, market positioning, and growth strategies

Technology & Product

Development, infrastructure, and technical implementation

Legal Compliance

Contracts, LGPD compliance, and proper corporate structure

Accounting & Fiscal

Financial management and regulatory compliance

Benefits for Startups

Professional From Day One

Founders stop drowning in technical decisions they don't master and focus on what matters most: vision, leadership, and innovation. This focused approach allows for better strategic thinking.

Qualified Team Without Hiring

Through iSelfToken, startups connect directly with market-validated specialist firms, with SLAs and mapped deliverables, eliminating the need for expensive early-stage hiring.

Capital Efficiency

No more spending on opportunistic agencies or poorly drafted contracts. Funds are allocated with intelligence and control, maximizing the impact of every dollar invested.

Path to Success

Structured Foundation

Professional governance from inception

Accelerated Growth

Faster market validation and traction

Increased Investment

Higher valuation and funding opportunities

Structured startups perform better, attract more investment, and gain momentum for traction and scale phases. The iSelfToken model creates a virtuous cycle where good governance leads to better performance, which in turn attracts more resources for continued growth.

Investor Benefits: Risk Reduction

Reduced Operational Risks

Investors gain peace of mind knowing that startups aren't "burning cash" with dubious suppliers or poorly executed strategies. The pre-vetted partner network ensures quality execution across all strategic areas.

With professional oversight in place, common early-stage mistakes that can sink promising ventures are significantly reduced, protecting the investment from day one.

The iSelfToken governance model creates a structured environment where capital is deployed strategically, with proper controls and accountability measures that significantly reduce the typical risks associated with early-stage investments.

Unlock insights.
Drive decisions.

Investor Benefits: Transparency

Fund Traceability
Direct allocation to strategic partners ensures complete visibility into how capital is being utilized

Progress Indicators
Detailed reporting and clear metrics to track development across all strategic areas

Real-time Monitoring
Investors can closely follow each phase and position themselves more securely for future rounds

Investor Benefits: Enhanced Value

Startups that follow the iSelfToken governance model are more organized, predictable, and valued in the long term. This structured approach positively impacts ROI by creating companies that are built on solid foundations rather than just promising ideas.

A New Tokenization Standard

Beyond Equity Tokenization

iSelfToken's proposal goes beyond simply tokenizing equity. It creates a new standard where governance and structure are built into the tokenization process from the beginning.

Ecosystem Revolution

By integrating professional governance with funding, we're revolutionizing how early-stage companies are built and funded, creating a more sustainable ecosystem.

Culture of Excellence

Our model fosters a culture where transparency, strategic intelligence, and professional execution become the foundation for growth and success.

Our Mission

Protect Ideas

Ensure promising concepts have the structural support to become viable businesses

Empower Talent

Allow founders to focus on vision and leadership while experts handle specialized areas

Safeguard Investments

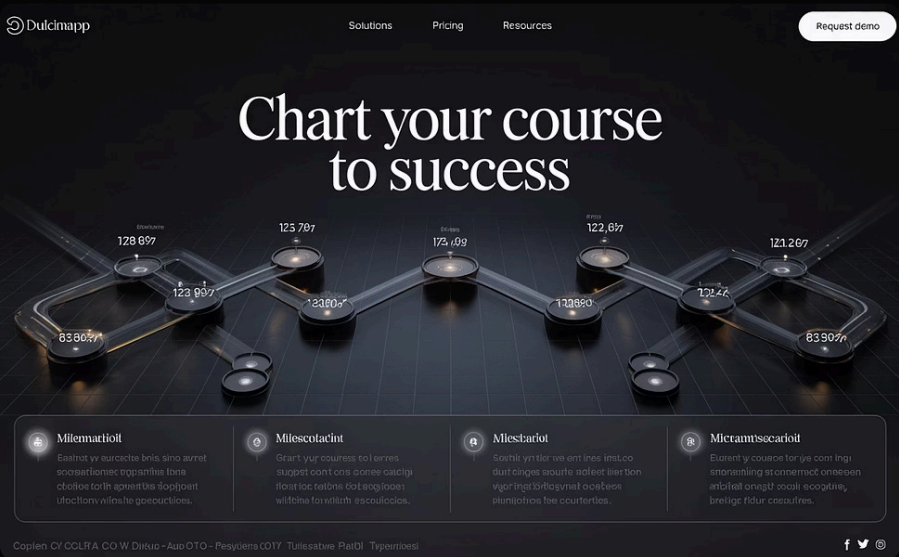

Create transparency and accountability to protect capital and maximize returns

For Founders: Beyond Capital

Strategic Guidance

Access to expertise that goes beyond funding, helping navigate complex business challenges with confidence and clarity.

Clear Path Forward

A defined roadmap with milestones and deliverables that creates structure and predictability in the chaotic early stages.

Focus on Vision

Freedom to concentrate on innovation and leadership while specialized partners handle technical execution in critical areas.

For Investors: Smart Money

iSelfToken transforms early-stage investing from a high-risk gamble to a structured investment approach. Our governance model ensures your money is used responsibly from day one, with transparency, accountability, and professional execution across all critical business functions.
